## EXCEL SCREEN SAVER

---

**EXCEL SCREEN SAVER** is a unique citrus and surfactants additive for the print paste. It lubricates and imparts a protective coating to rotary /flatbed screens to eliminate “scabby” screens that cause poor print quality. The surfactants also act as a penetrant, thus eliminating the need for a separate penetrant. The citrus/surfactant components reduce screen cleaning time and makes the job much easier.

### **GENERAL PROPERTIES:**

Appearance: Yellowish liquid

Ionic Nature: Nonionic

pH: 7.5-8.5

Odor: Citrus

### **FEATURES:**

1. Lubricates and protects printing screens.
2. When used in the paste, makes screen cleaning quicker and more efficient.
3. Reduces the need for a penetrant in the print paste.
4. Environmentally friendly chemistry.

### **METHOD OF APPLICATION:**

Add 2% on weight of the paste **EXCEL SCREEN SAVER** and mix well before adding pigments. If screens are extremely dirty and “scabby”, **EXCEL SCREEN SAVER** can be applied directly to screens with a brush or rag. Let soak in and clean with automatic screen cleaning machine or water hose.

Once you use it, you’ll never print without it!
