## EXTRALEV NY

Leveling Agent for acid and premetallized dyes on nylon and wool

---

**EXTRALEV NY** is a mildly cationic leveling agent specifically designed to help level acid and premetallized dyes on nylon and wool. It allows the dyes to slowly exhaust onto the goods as the dyebath temperature is elevated.

### GENERAL PROPERTIES:

|               |                   |
|---------------|-------------------|
| Appearance:   | Yellow liquid     |
| Ionic Nature: | Mildly cationic   |
| pH:           | Approx. 7.0 - 8.0 |
| Solubility:   | Soluble in water  |

### FEATURES:

1. Allows even and uniform exhaustion during the dyeing cycle
2. Effectively increases dye solubility promoting maximum coverage, levelness and color yield.
3. An Excellent dyestuff antiprecipitant with no adverse effect on dye fastness properties.
4. May be used to correct unlevel or faulty dyeing on nylon.

### METHOD OF APPLICATION:

Dyebath: 1% owg is recommended for heavy shades to 3% usage on light shades
