EXTRASCOUR ALK

Multicomponent Bleach/Scouring Agent

EXTRASCOUR ALK is a multicomponent, anionic, highly alkaline scouring, bleaching and chelating agent. It requires no extra peroxide stabilizer. The product removes maximum amounts of fiber finish, knitting lubricants and sizing materials. In addition to excellent cotton scouring, it is recommended for polyester cotton blends. The scouring action begins even at low temperatures and continues at high temperatures.

GENERAL PROPERTIES:

Appearance:	Light yellow liquid
Composition:	Alkali, chelate and anionic surfactants
S.G.	Approx. 1.130
pH:	10-11
Solubility:	Readily soluble in water

FEATURES:

1. **EXTRASCOUR ALK** is an excellent all in one scouring agent for cotton and poly/cotton blends.
2. **EXTRASCOUR ALK** is low foaming for easy use in most preparation equipment.
3. **EXTRASCOUR ALK** is used for bleaching with no additional stabilizing agents.

METHOD OF APPLICATION:

1-2% owg is recommended for jet, beck, jig and garment processing applications, when a prescour is done.

For Peroxide bleaching 3-5% is suggested depending upon the amount of peroxide used.
